

Concept Office Solutions is a Customer Service focused company, very happy to service all the needs of our clients from concept to completion.

- Concept Design** Our Interior Designer and Project Managers will work with the Client, Commercial Architect, or Interior Design firms to offer guidance to ensure the best combination of Steeline® and in-house custom made cabinetry.
- Renovation** When updating and improving your current office we can work with you to assess your future growth to ensure that your business needs are met in the short and long term.
- Quoting** This may be done at the budget stage, when sourcing funds for the project. Once plans are finalised a fully comprehensive quotation will be submitted.
- Manufacturing** Once manufacturing has commenced we can advise you at each stage of the process how your project is progressing.
- Installation** Our fully qualified Installation Team will be responsible for the fit out, whilst liaising with the Project Management Team or Designer, who will oversee and manage the project, works until completion and hand over.

Contact us at Concept Office Solutions to see how we can help you create an environment for staff and visitors, which will be a pleasure to be in - at the same time maintaining all the organisational and functional requirements of an efficient and productive office.
